Instructions from the American Board of Pediatrics

The ABP approves QI projects for MOC that are established, structured, and sustainable; have demonstrated improvements in care; and are based on accepted improvement science and methodology. Participating in an ABP-approved quality improvement project allows you to improve care for your patients, develop additional skills and knowledge, and earn credit for maintaining your certificate on the basis of your day-to-day work. If you are participating in the QTIP ADHD project module, here's how you earn MOC credit for Performance in Practice:

1. Fulfill the meaningful participation requirements described below.
2. Complete the ABP Physician Participation Attestation form.
3. Send your attestation to your project's designated leader, who will co-sign it.
 - a) The project leader notifies the ABP that you fulfilled the meaningful participation requirements and that your attestation is complete.
 - b) The ABP updates your record showing that you earned credit for the Part IV MOC.

Participation in Quality Improvement Projects

For a pediatrician to earn MOC credit by working on an approved QI project, the ABP requires "meaningful participation". Meaningful participation involves both an active role in the project and participation over an appropriate period of time.

Active Role

For MOC purposes, an "active role" means the pediatrician must:

- Provide direct or consultative care to patients as part of the QI project.
- Implement the project's interventions (the changes designed to improve care).
- Collect, submit and review data in keeping with the project's measurement plan.
- Collaborate actively by attending at least four project meetings.

MOC Activity Completion

When you have fulfilled the requirements for meaningful participation (i.e. you've met the project's requirements for length of participation plus the "active role" criteria), you have "completed" the activity for purposes of MOC credit (MOC activity completion). Note that your MOC activity completion date must be within the period that spans your current certificate period or MOC cycle. For example, if you hold a seven-year certificate, the completion date must be during the seven-year certificate period. If you are enrolled in a five-year MOC cycle, the completion date must be during the five-year MOC cycle.

Maintenance of Certification Credit for Design and Implementation of QI Projects

In some cases, pediatricians play a major role in designing and leading the implementation of QI projects but do not actually care for patients through the project. You may be eligible to receive credit for design and leadership work on an MOC-approved project. Contact Francis Rushton at frushton@aap.net for more information.

Documentation of Participation

After you fulfill all participation requirements, submit the ABP's Physician Participation Attestation form describing your involvement in the quality improvement project. Your attestation must also be co-signed by the physician project leader of the quality improvement project. The attestation form is located electronically at https://www.abp.org/abpwebsite/moc/performanceinpractice/approvedq1projects/approved/submitting_attestation.pdf. The physician project leader will subsequently forward notice of completion to the ABP, and you will receive credit for your participation.

Provision of Optimal Access to the Pediatric Primary Care Office

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on access to care in the pediatric office. It supports improvements in the CHIPRA Quality Improvement measure “Children and Adolescent’s Access to Pediatric Primary Care Providers” to document that 95% of patients assigned to a medical home are seen each year. Participating in this QI project allows practitioners to improve patient’s timely access to services, promote patient satisfaction, develop office skills and knowledge, improve the medical home capabilities of their practices and earn ABP Part IV MOC Credits upon completion. Currently there is no fee for eligible members of the SC AAP to participate in this project.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) and or surveys to measure and assess improvement in skills associated with 3 or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits or surveys of 10 patients over a 6-month time span, including a baseline chart/ survey review and 2 subsequent PDSA cycles for performance improvement on at least 2 of the 5 following criteria. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Audit of Open Access by measuring number of same day appointment available at the beginning of the day for 5 straight days.
 - b. Audit of Clinical Call Response Time for telephone queries for 1 week with a stated standard for the office for the response time.
 - c. Audit of charts to ensure that telephone advice is recorded both during and after office hours.
 - d. Audit of chart to ensure that a personal clinician is recorded and audit to measure percentage of visits in which patient sees their personal clinician
 - e. Achievement of level 2 NCQA PCMH status or higher using 2011 criteria.
 - f. Development and documentation of improved transfer of referrals/ information in the pediatric record between the office and other agencies such as Baby Net, Head Start, First Steps and Family Connection on mutual clients/ patients in a HIPPA observant fashion
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project must be entered in the QTIP Blog log.
3. Agree to incorporate practice-side changes and participate in a minimum of 3 contacts with the office QI team.

To earn credit, you must play an active role in your practice’s Access to Care QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton prior to beginning work for certification.

Start date: 04/04/2011 End date: 03/31/2016 The Access to Care QI project is one component of a statewide pediatric outpatient quality improvement partnership

Revised April 3, 2012, January 2015, July 2015

Management of Asthma in the Primary Care Office QI Project

Part IV American Board of Pediatrics MOC Credit offered for participating SC AAP members

This performance improvement focuses on effective management of pediatric asthma and supports the CHIPRA QI measure for reduction in the annual number of asthma patients with more than 1 asthma-related emergency department (ED) visit. Participating in project allows practitioners to improve patient care, develop additional skills and knowledge, and earn ABP Part IV MOC Credits. There is no fee for SC AAP members to participate in this project. Participating practitioners will be required to work with their practice-based QI team using chart review(s) to measure and assess improvement in skills associated with two or more of the following practice quality criteria. Practices must perform and record a minimum of 3 periodic chart audits of 10 charts over a 6-month timespan including a baseline chart review and 2 subsequent PDSA cycles for performance improvement and design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. New and/or existing asthmatics seen in the office over the previous 30 days can be included in each 10-chart sample.

1. Chart audits on ASTHMATICS must check for documentation on any 3 of the following:
 - i. Classification of asthma severity, including objective measurement of lung function
 - ii. Medication(s) and device(s) prescribed
 - iii. Provision of written asthma action plans for home and school
 - iv. Plan for patient access to oral corticosteroids when needed (e.g., individual prescription, call policy)
 - v. Identification of individual triggers and plan for management/minimization of effects of individual triggers
 - vi. Demonstration of correct inhalation and measurement device use
 - vii. Promotion of smoking cessation
 - viii. Scheduled follow-up visit
 - ix. Emergency Department (ED) visits and hospitalizations since previous visit
 - x. Rescue medication and oral corticosteroid use since previous visit
 - xi. Validated patient questionnaire (e.g., Asthma Control Test™ [ACT] reviewing previous month's level of control or similar questionnaire)
 - xii. Checks for non-adherence (e.g., accurate medication refill history), improper inhaler technique, lack of trigger control
 - xiii. Scheduled follow-up visit

To earn credit, you must play an active role in your practice's Asthma QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work. For registration for ABP MOC Part IV Credit contact Francis Rushton at frushton@aap.net or 843 4413368

Provision of Developmental Screening to Preschool Children in the Primary Care Office

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on developmental screening in the preschool period as recommended by the American Academy of Pediatrics and supports meeting a corresponding CHIPRA Quality Improvement (QI) measure for developmental screening. Participating in this QI project allows practitioners to improve patient care, develop additional skills and knowledge, accomplish timely interventions and referrals for children with potential developmental delay and earn ABP Part IV MOC Credits upon completion. Currently there is no fee for members of the SC AAP to participate in this project.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) to measure and assess improvement in skills associated with one or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits of 10 charts over a 6-month time span, including a baseline chart review and 2 subsequent PDSA cycles for performance improvement on at least 1 of the 4 following criteria. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Documentation of a PEDS or Ages and Stages developmental screening at 9 months of age, 18 months of age, and between 2 and 3 years of age at the time of a well-child visit (Goal: 70 percent of eligibles)
 - b. Documentation of a screen for autism such as the MCHAT at the time of well child visits between 15 months and 3 years of age.
 - c. Documentation of service provision, further evaluation or referral for those children who screen as "at risk"
2. Documentation of screening for maternal depression and or psychosocial risk and or substance abuse and or domestic violence during the newborn period. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project requirements must be entered in the QTIP Blog log.
3. Agree to incorporate practice-side changes and participate in a minimum of 3 contacts with the office QI team.

To earn credit, you must play an active role in your practice's Developmental Screening QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification.

Start date: 04/04/2011 End date: 03/31/2016 The Developmental Screening QI project is one component of a statewide pediatric outpatient quality improvement partnership

April 9, 2012, revised January 2015, reviewed July 2015

Provision of Family Centered Care in the Pediatric Primary Care Office

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on effective provision of family centered care and consumer satisfaction with the care they receive in pediatric offices and supports improvements in the CHIPRA Quality Improvement (QI) measure “Consumer Assessment of Providers and Systems”. Participating in this QI project allows practitioners to improve patient care and satisfaction, develop additional skills and knowledge, improve the medical home capabilities of their practices and earn ABP Part IV MOC Credits upon completion. Currently there is no fee for SC chapter members of the AAP to participate in this project.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) and or surveys to measure and assess improvement in skills associated with one or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits or surveys of 10 patients over a 6-month time span, including a baseline chart/ survey review and 2 subsequent PDSA cycles for performance improvement on at least 2 of the 5 following criteria. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Review of a practice’s or practice’s managed care CAPHS (Consumer Assessment of Healthcare Providers and Systems: Child version) data and development of a plan to address deficiencies so that practices score greater than 80%. Follow-up surveys must be performed at least twice to document improvement.
 - b. Office review of parent to parent support policies, including a patient survey, with consultation with Family Connection and documented improvement over time of parent to parent support
 - c. Achievement of level 2 NCQA PCMH status or higher using 2011 criteria.
 - d. Development and documentation of improved transfer of referrals/ information in the pediatric record between the office and other agencies such as Baby Net, Head Start, First Steps and Family Connection on mutual clients/ patients in a HIPPA observant fashion
 - e. Periodic survey of families focused on satisfaction of health care services including rating of personal doctor, ability to get needed care, shared decision making, doctor communication and care coordination
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project requirements must be entered in the QTIP Blog log.
3. Agree to incorporate practice-side changes and participate in a minimum of 3 contacts with the office QI team.

To earn credit, you must play an active role in your practice’s Family Centered Care QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification.

Start date: 04/04/2011 End date: 03/31/2016 The Family Centered Care QI project is one component of a statewide pediatric outpatient quality improvement partnership between the SC AAP and SC DHHS

Provision of All Well Child Visits in the Pediatric Primary Care Office

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on preventive care in the pediatric office. It supports improvements in the 3 CHIPRA Quality Improvement measures dealing with well child visit completion. Our goal is for 80 % of patients to receive 5 or more well child visits during the first 15 months, for 50% of children to receive 3 well visits between 3 and 6 years, and for 50% of eligible adolescent well visits to be completed. Participating in this QI project allows practitioners to promote preventive care services, to refine skills and routines, promote patient satisfaction, improve the medical home capabilities of their practices and earn ABP Part IV MOC Credits upon completion. Currently there is no fee for SC AAP members to participate in this project.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) and or surveys to measure and assess improvement in skills associated with 3 or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits or surveys of 10 patients over a 6-month time span, including a baseline chart/ survey review and 2 subsequent PDSA cycles for performance improvement on at least 1 of measures a, b or c and at least 1 of measures d, e f and g below. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Audit of completion rate of first 6 well child visits at 2 months, 4 months, 6 months, 9 months, 12 months and 15 months of age.
 - b. Audit of completion rate of well child visits at 3, 4, 5 and 6 years of age.
 - c. Audit of completion rate of adolescent well child visits.
 - d. Develop and audit the use of reminder systems such as card systems and phone calls,
 - e. Develop and audit the use of tracking systems to determine those who need well child visits,
 - f. Encourage and measure whether sick visits were converted to well child visits when time permits and a patient is behind and
 - g. Chart audits to identify patients who need to be contacted for well child visits.
 - h. Audit two or more components of Bright Futures to ensure that Bright Futures is included in the content of well child care
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project must be entered in the QTIP Blog log.
3. Agree to incorporate practice-side changes and participate in a minimum of 3 contacts with the office QI team.

To earn credit, you must play an active role in your practice's Well Child Visit QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification.

Start date: 04/04/2011 End date: 03/31/2016 The Well Child Visit QI project is one component of a statewide pediatric outpatient quality improvement partnership between the SC AAP and SC DHHS

ADHD follow-up care for Children Prescribed Medicine QI Project

Part IV American Board of Pediatrics MOC Credit offered for participating SC AAP members

Instructions from the QTIP (Quality through Technology and Innovation in Pediatrics) Project

This project is focused on the CHIPRA QI measure dealing with the diagnosis and follow-up of children begun on stimulant medication. Participating pediatricians will be required to work with their practice-based quality improvement team within a South Carolina QTIP or CATCH participating practice. Practitioners will perform and measure skills associated with the use of a standardized instrument for diagnosis of ADHD, the use of national recommendations for follow-up visits and the incorporation of safety, efficacy and cost effectiveness knowledge into prescribing habits. Practitioners can earn ABP Part IV MOC Credits upon completion. Currently there is no fee for SC AAP members to participate in this project. There is no fee for members of the SC AAP to participate in this project.

Project Minimum Requirements:

- A. At a minimum 3 chart audits at least a month apart of 10 charts each will be performed and recorded. Chart audits on new patients prescribed stimulants between 6 and 12 years of age must document
 - a. If a follow-up visit was performed within 45 days of beginning a new stimulant,
 - b. If a Vanderbilt or similar standardized instrument used, and
 - c. What, if any, medications were prescribed.
- B. At least two PDSA cycles will have been designed and documented to improve performance.
- C. Practitioner must have agreed to practice side changes and participated in a minimum of 3 contacts with the office QI team.
- D. For physicians involved in a QTIP practice, the data supporting completion of the project requirements must be entered in the QTIP Blog log.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification.

Part IV MOC Point Value: 25

Start date: 02/01/2011 End date: 02/28/2016

Provision of Behavioral Health Services to Children in the Primary Care Office

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on augmentation of behavioral health services in the primary care pediatric office and supports the activities of SCDHHS in improving mental health service delivery. Participating in this QI project allows practitioners to improve patient care, develop additional skills and knowledge, accomplish timely interventions and referrals for children with potential behavioral health challenges and earn ABP Part IV MOC Credits upon completion. Currently there is no fee for eligible members of the SC AAP in this project.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) to measure and assess improvement in skills associated with one or more of the following practice quality criteria:

1. Perform a minimum of 3 periodic chart audits of 10 charts over a 6-month time span, including one baseline chart review. The following two periodic chart audits need to follow PDSA cycles for performance improvement on at least 2 of the 7 following criteria. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Completion of the AAP's Mental Health Practice Readiness Inventory with Kristine Hobbs and development of a plan to address weak areas in the practice. Participating practices may substitute repeat measurement of their mental health readiness using the Inventory in lieu of chart audits. Contact Kristine Hobbs for assistance
 - b. Documentation of expanded mental health screenings using one or more of the following: Pediatric Symptom Check List, screens available from TeenScreen.org, depression screens, PHQ 9, SWYC, CHADIS system or other screens as approved by QTIP.
 - c. Documentation of service provision, further evaluation, or referral for those children who screen "at risk"
 - d. Documentation of mental health referrals and correspondence back from the mental health provider in the chart that assists with management of the child in the pediatric medical home.
 - e. Documentation of screening for one or more of the following: maternal depression, psychosocial risk, substance abuse or domestic violence during the newborn period.
 - f. Referral and documentation of parent to parent support through Federation of Families (www.fedfamsc.org or diane.flashnick@fedfamsc.org)
 - g. Audit of all patients in a practice discharged from a mental health facility for evidence of appropriate follow up in the pediatric medical home including an initial visit within 30 days of discharge (As specified in the CHIPRA Core Measure: Follow-up After Hospitalization for Mental Illness)
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project requirements must be entered in the QTIP Blog log.
3. Agree to incorporate practice changes and participate in a minimum of 3 contacts with the office QI team.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification. For more information on QTIP behavioral health interventions contact Kristine Hobbs at Hobbs@scdhhs.gov or 803-898-2719. The Behavioral Health QI project is one component of a statewide pediatric outpatient quality improvement partnership
 Start date: 04/04/2011 End date: 03/31/2016.

April 9, 2012, revised Jan. 2015, reviewed July 2015

Decreasing Inappropriate ED Usage by Pediatric Medical Home Patients

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on Emergency Department (ED) Utilization by patients in pediatric medical homes. It supports improvements in the 2 CHIPRA Quality Improvement measures dealing with general ambulatory ED usage and usage by patients with asthma. Our goal is to reduce ED use to less than the national benchmark of 67.7 visits per 1000 patients. Participating in this QI project allows practitioners to diminish inappropriate ED usage, provide cost efficient care, promote patient satisfaction, improve the medical home capabilities of their practices and earn ABP Part IV MOC Credits upon completion. This project is offered in partnership with the SC AAP and currently there is no fee for chapter members to participate.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) and/or surveys to measure and assess improvement in skills associated with 3 or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits or surveys of 10 patients over a 6-month time span, including a baseline chart/ survey review and 2 subsequent PDSA cycles for performance improvement on measure a and at least 2 of measures b through h. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Audit of number of ER visits from a particular practices patient panel or subset of panel to the ER.
 - b. Audit of appropriateness of ER visits using practice developed criteria.
 - c. Monitor adequacy of office nurse advice line both during and after office hours, with an audit of response time and whether advice was documented in the cart.
 - d. Open Access determination in offices: by measuring number of same day appointment available at the beginning of the day for 5 straight days.
 - e. Evaluation and measurement of adherence to office walk in policy,
 - f. Improved case management including monitoring turnaround time for labs.
 - g. Extended hours and measurement of impact on ED use
 - h. Anticipatory guidance concerning appropriate ER utilization.
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project must be entered in the QTIP Blog log.
3. Agree to incorporate practice-side changes and participate in a minimum of 3 contacts with the office QI team.

To earn credit, you must play an active role in your practice's Emergency Department Utilization QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification.

Start date: 04/04/2011 End date: 03/31/2016 The Emergency Department Utilization QI project is one component of a statewide pediatric outpatient quality improvement partnership between the SC AAP and SC DHHS.

April 9, 2012, revised Jan. 2015, reviewed July 2015

Management of Oral Health Issues in the Primary Care Office

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on effective management of oral health issues. It supports the CHIPRA Quality Improvement (QI) measure to improve to 75% the number of children in SC receiving both preventive and acute care oral health services in the dental office. The project encourages the delivery of fluoride varnish in pediatric medical homes and improvements in oral health anticipatory guidance. Participating in this QI project allows practitioners to improve patient care, develop additional skills and knowledge, and earn ABP Part IV MOC Credits upon completion. Currently there is no fee for members of the SC Chapter of the AAP to participate in this project.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) to measure and assess improvement in skills associated with one or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits of 10 charts over a 6-month time span, including a baseline chart review and 2 subsequent PDSA cycles for performance improvement on at least 2 of the 5 following criteria. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Chart documentation of an oral health home or referral to such in practice well child visit notes.
 - b. Documentation of an Oral Exam at each well child visit
 - c. Risk Assessment documented for each child at the time of the well child visit to include: a. Presence of Medicaid insurance, family oral health status, prematurity and special health care need.
 - d. Provision of Fluoride varnish every 6 months between ages 6 months and 3 years of age in high risk children in the pediatrician's office
 - e. Documentation of anticipatory guidance around oral health issues including exposure to fluoride in the diet.
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project requirements must be entered in the QTIP Blog log.
3. Agree to incorporate practice-side changes and participate in a minimum of 3 contacts with the office QI team.

To earn credit, you must play an active role in your practice's Oral Health QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification.

Start date: 04/04/2011 End date: 03/31/2016 The Oral Health QI project is one component of a statewide pediatric outpatient quality improvement partnership between the SC AAP and SC DHHS.

November 24, 2012, revised January 2015, revised July 2015

Treatment and Prevention of Obesity in the Pediatric Primary Care Office

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on obesity efforts in the pediatric office. It supports improvements in the CHIPRA Quality Improvement measure related to the measurement of BMI in the pediatric primary care record. Participating in this QI project allows practitioners to improve documentation of BMI and BMI percentiles in their patient records, to document the inclusion of obesity in the patient's problem list when appropriate, and to document appropriate advice for children related to breast feeding, childhood activity, nutrition, media exposure and motivational interviewing focused on obesity issues. Participants can earn ABP Part IV MOC Credits upon completion. Currently there is no fee for eligible members of the SC AAP to participate in this project.

Participating practitioners will be required to work with their practice-based QI team using chart review(s) and or surveys to measure and assess improvement in skills associated with 3 or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits or surveys of at least 10 patients over a 6-month time span, including a baseline chart/ survey review and 2 subsequent PDSA cycles for performance improvement on at least 2 of the 5 following criteria. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. Audit of BMI and BMI percentiles recorded in the patient chart.
 - b. Audit of documentation of obesity in the problem list in the patient chart for those with a BMI greater than the 95th percentile.
 - c. Audit of breast feeding rates over time for that practitioner or practices patient populations.
 - d. Audit of chart to ensure that advice in regards to nutrition is recorded in the patients record
 - e. Audit of chart for evidence of advice re media exposure, physical activity or motivational interviewing for those patients with BMIs greater than the 95th percentile
 - f. Audit of charts for laboratory evaluation of those determined to be obese
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project must be entered in the QTIP Blog log.
3. Agree to incorporate practice-side changes and participate in a minimum of 3 contacts with the office QI team.

To earn credit, you must play an active role in your practice's Access to Care QI project (See instructions from ABP). If you play a major role in designing and leading the implementation of the QI project, but do not actually care for patients. You are also eligible to receive credit design and leadership work.

Registration and documentation of Participation for Part IV MOC Credit: Please contact Francis Rushton at frushton@aap.net at the beginning of your project to ensure it will meet requirements for credit. In QTIP practices with a designated lead clinician for quality improvement, the applicant for MOC credit must provide the lead clinician with their ABP number and be certified as having participated in the activity. The lead clinician is responsible for letting the QTIP office know of all individuals receiving credit. Non-QTIP pediatricians, or lead clinicians, must contact Francis Rushton for certification.

Start date: 06/30/2012 End date: 06/30/2016 The Obesity QI project is one component of a statewide pediatric outpatient quality improvement partnership between the SC AAP and SC DHHS.

Treatment of Adolescent Health and Sexuality Issues in Pediatric Primary Care

Part IV American Board of Pediatrics MOC Credit offered for SC AAP members

This QTIP sponsored QI project focuses on adolescent sexuality counseling and treatment in the pediatric office. It supports improvements in the CHIPRA Quality Improvement measure related to

1. Adolescent immunization administration, including the HPV vaccine
2. Chlamydia screening in sexually active adolescents,
3. Referral of adolescent girls diagnosed as being pregnant for OB/GYN care in the first trimester,
4. Documentation of discussions of confidentiality and sexuality as part of the adolescent well child visit and
5. Adolescent well child visit completion rates.

Participants can earn ABP Part IV MOC Credits upon completion. Currently there is no fee for eligible members of the SC AAP to participate in this project. Participating practitioners will be required to work with their practice-based QI team using chart review(s) and or surveys to measure and assess improvement in skills associated with 3 or more of the following practice quality criteria.

1. Perform a minimum of 3 periodic chart audits or surveys of at least 10 patients over a 6-month time span, including a baseline chart/ survey review and 2 subsequent PDSA cycles for performance improvement on at least 2 of the following criteria. New and/or existing patients seen in the office over the previous 30 days can be included in each 10-chart sample.
 - a. HPV immunization completion rates.
 - b. TDAP and Menatra immunization rate.
 - c. Varicella booster vaccine rates.
 - d. Audit of charts to ensure that advice in regards to teen health and sexuality issues is discussed.
 - e. Audit of charts to ascertain if adolescents are screened for exposure to chlamydia and if a chlamydia urine test was done for those sexually active.
 - f. Audit of charts to ascertain if a confidentiality discussion was held with the patient.
 - g. Audit of charts of patients diagnosed as pregnant to ascertain whether OB or GYN care was begun within the first trimester.
 - h. Audit of adolescent well child visits to ascertain percentage of visits completed
2. Design, implement and document a minimum of 2 PDSA cycles to improve baseline performance. For physicians involved in a QTIP practice, the data supporting completion of the project must be entered in the QTIP Blog log. Other practitioners must provide their data to QTIP medical director Francis Rushton
3. Agree to incorporate practice-side changes and participate in a minimum of 4 contacts with the office QI team.
